OUTDOOR STATION

WIZARD BRONZE IP

Looking for something special? The Wizard Bronze IP satisfies the wishes of the most demanding customer.

This recessed device is made entirely of copper. It can be bronzed in 3 different colours.

SPECIFICATIONS

1. Fastening screws in copper.
2. Individually fixed copper armatures protect the loudspeaker against rain, wind, and dust.
3. The 160° color camera is very subtly concealed so that your visitor does not feel spied on and vandalism is not attracted.
4. The push buttons are made in copper and enlightened in the middle.
5. Names, logo and house number can be engraved and coloured.
6. The keyboard has 3 functions: access control, telephone, and destination selection (if more than 3 buttons are required). Wiegand output for connection to external access control system is standard.
7. Very sensitive and protected microphone.
8. Housing in copper.

OUTDOOR STATION

WIZARD BRONZE IP

The Wizard Bronze is entirely made out of copper. They can be bronzed in 3 different colors. In the photo on the right an example of matt rustic.

The brass (=yellow metal) base material can also be polished to gleaming brass, which is very popular in Southern countries. In Western Europe people mainly choose the exclusive brass with matt finish.

No matter what color or finish you choose, this product is the absolute best for people who wish for something special and unique.

4 COLOUR VARIATIONS

- FTBM240...: Bronze matte
- FTBR240...: Bronze rustic matte
- FTBG240...: Bronze gold matte
- FTBX240...: RAL color of your choice

WIZARD BRONZE IP

EXTENSION MODULES

FTEKEY

A fingerprint reader that is discretely mounted from the back. So, it lies flush with the front plate.

FTPROXI

Like the FTEKEY, the optional proximity reader is mounted seamlessly with the front plate from the rear. Only 26x26 mm in size!

FTNAME

Fasttel can fit your Wizard Bronze with an engraved coloured name and a house number. You can choose the font type and colour. Even logos are possible.

CUSTOMISATION

The models shown on the previous pages are all stock items. However, customization is no problem at all if you require special sizes.

Fasttel can also easily install your own equipment, such as QR or badge readers, finger scanners, letter boxes, etc.

FT4SWIP

The FT4SWIP is needed when you need to be able to control multiple ports independently. This module also increases safety: after all, the relays are inside.

This module shows by means of its inputs the status of multiple ports (open/close) on both the VISITOR! as our app.

FTPAIN

We are also happy to help customers who prefer a different colour than the 3 bronze variants. Let us know your desired RAL colour or supply your own powder and we will paint each part separately.

In this example:
RAL 9010 and printing RAL 9018

WIZARD BRONZE IP

LETTER BOXES

FLUSH MODELS

WIZARD BRONZE + FT24LETTERH

Horizontal configuration

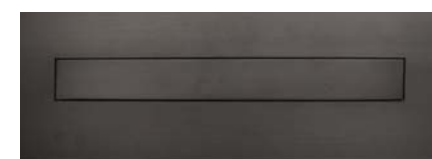

You configure your outdoor unit according to the options on page 4-8. The letter box flap is completely flat, which makes its integration as minimalistic as possible.

WIZARD BRONZE + FT24LETTERV

Vertical configuration

You configure your outdoor unit according to the options on page 4-8. The letter box flap is completely flat and so it is integrated as minimalistic as possible.

FT24BR

Horizontal or vertical configuration

This letter box can be placed vertically or horizontally. It's the same size as the Wizard Bronze. This makes them the perfect bronze duo!

KEYPADS IN BRONZE AND A VARIETY OF BRONZE

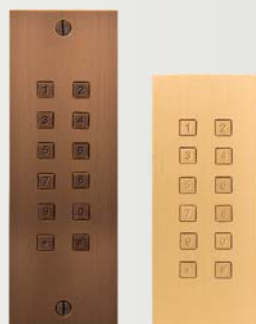

FT24K ACCESS KEYPAD

Stand alone or Wiegand keypad.
Flush or surface mounted.
Has 2 relays as standard.

FT24K outdoor module

button.

FT23K ACCESS KEYPAD

Stand alone or Wiegand keypad.
Flush or surface mounted.
Has 2 relays as standard.

FT23KF outdoor flush module
FT23K outdoor surface
module
FT25KINT indoor module with
2 relays

Expandable with FT23PB:
Integrated bronze bell
button.

FT24NP NAME PLATE

A nameplate may not say every-
thing, but it does say a lot. After
all, it is your first business card
to the outside world. You are
associated with it by everyone
who passes by.

Fasttel also helps you to
distinguish yourself from the
rest in this regard.

FLEXRING

This module is truly unique: it is
a classic door bell but its name
indication can be changed from
anywhere in the world.

A built-in web browser gives
access to the LCD display
making changes as easy as
child's play.
